SUMMARY

Senior Frontend Developer with 4 years across **Shine.com** (HT Media — top-3 Indian job portal, 40M+ monthly visitors) and **PayPal's engineering team** (via HCL). Implemented the migration of Shine.com to React 19 + Next.js 15 App Router + TypeScript 5, built Playwright E2E testing infrastructure from zero, and developed the shared component library used across web and React Native. Strong in performance engineering, GraphQL, and frontend architecture.

SKILLS

Stack: React 18/19 · Next.js 15 (App Router) · TypeScript · JavaScript ES6+ · React Native · Vue.js · **Architecture:** SSR · ISR · React Server Components · Core Web Vitals · SEO · WCAG 2.1 · **State & Data:** Redux Toolkit v2 · TanStack Query v5 · Zustand · Apollo Client · GraphQL · **Testing:** Playwright · Jest · React Testing Library · **Tools:** Tailwind CSS · SASS · Git · Webpack · Vercel · AWS · New Relic · Figma

EXPERIENCE

HT Media — Shine.com

Sep 2025 – Present

Senior Frontend Developer · Gurugram
India's 2nd largest media group · top-3 job portal · 40M+ monthly visitors · 10M+ app downloads

- Implemented **Next.js 15 App Router + React Server Components** on Shine.com — migrated fragmented Vue 2 + React 17 + Next.js 12 codebase to a unified React 19 + TypeScript 5 platform
- Built **Playwright E2E testing infrastructure from zero** — platform had no automated tests; set up architecture and wrote suites covering core user flows including job search, apply, and auth
- Achieved **CLS 0 (Lighthouse perfect score)** reduced from 0.138; maintained FCP 0.9s and TBT 20ms (100/100) post-migration **CLS 0.138 → 0**
- Designed **shared TypeScript component library** used across web + React Native; rebuilt Vue 2 dashboard in React; migrated state to RTK v2 + TanStack Query v5 + Zustand
- Shipped **React Native** job search, filters, and dashboard features for Shine app with 10M+ downloads

HCL Technologies — Embedded at PayPal

Sep 2022 – Sep 2025

Software Developer, Frontend · Noida
Fully embedded in PayPal's engineering team · Lighthouse Insightly — enterprise SaaS analytics platform for PayPal clients

- Delivered frontend features end-to-end within **PayPal's own engineering workflow and peer-review process** — operating at the same standard as the senior product team from day one
- Built React modules for **funnel analysis, cohort segmentation, and behavioural analytics** used by enterprise clients
- Optimised **GraphQL + Apollo Client** with field-level caching and deduplication — reduced API overhead on complex data views
- Resolved rendering bottlenecks using **React DevTools Profiler**; integrated APIs with error boundaries and retry logic throughout
- Collaborated with product and design teams to translate complex multi-dimensional data requirements into clean, responsive dashboard UI within **PayPal's internal design system**

PROJECTS

Motionfolio github.com/KUSHWAHA-S/Motionfolio

Next.js 14 · TypeScript · Supabase · Tailwind CSS · Framer Motion · ISR
End-to-end multi-tenant SaaS where users sign up, pick from multiple portfolio templates, customise sections, and publish to a unique public URL. Each template uses **Framer Motion** for distinct animated layouts — scroll-triggered reveals, page transitions, and section-level motion presets. Auth and data fully handled by **Supabase** (Auth + Postgres + Storage) with row-level security for portfolio ownership and public/private visibility toggle. ISR used over CSR so every public portfolio is SEO-indexed without per-request server cost.

Cognition UI github.com/KUSHWAHA-S/Cognition-UI

Next.js 15 · TypeScript · Node.js · PostgreSQL · D3.js · Recharts · Supabase
Behavioural analytics SaaS that goes beyond click tracking — classifies each user session into a cognitive archetype (Explorer, Goal-seeker, Confused, Comparison-shopper) by scoring click velocity, hover hesitation, backtrack rate, and scroll depth. Built a lightweight **vanilla JS tracking SDK** embedded on client sites, a rule-based classification engine, and a dashboard with **Recharts** overview metrics and **D3.js** Sankey diagrams showing click flow filtered by archetype. ML-based intent classification currently being integrated to replace the rule-based scorer.

EDUCATION

Rajkiya Engineering College, Kannauj · B.Tech Computer Science · CGPA 8.3 / 10

2018 – 2022
